Alvium G1 – Reliability designed for the future

Compact GigE camera for constant image quality

Alvium G1-040 with Sony IMX287 runs 276.0 frames per second at 0.4 MP resolution.

Alvium G1 is the first GigE Vision camera powered by ALVIUM® Technology, Allied Vision's ASIC chip. It combines the advantages of the established GigE Vision standard with the flexibility of the Alvium platform. In addition to a comprehensive feature set and a broad sensor selection, it offers great versatility. With its very compact housing and industrial standard hardware, it can easily be integrated into any vision system while ensuring long-term availability and reliability.

Easy software integration with Allied Vision's Vimba Suite and compatibility to the most popular third party image-processing libraries.
