## **INDUSTRIAL/MACHINE VISION APPLICATIONS**

# FLIR BLACKFLY<sup>®</sup> S BOARD-LEVEL

P/N BFS-U3-50S5-BD2

### SMALL PACKAGE, POWERFUL RESULTS

The Blackfly S is a compact, high performance machine vision camera that allows designers to easily produce the exact images they need. With both automatic and precise manual control over image capture and on-camera pre-processing, the Blackfly S accelerates application development.

www.flir.com/mv

#### FEATURES

Leverage the latest CMOS sensors and new oncamera image processing features. Harness increased binning flexibility, powerful auto-exposure controls and robust color transformation tools.

Improve cycle time using advanced camera controls and programmable logic Utilize sequencer, chunk data, event notification, counters, timers and logic blocks.

Accelerate your time to market using our GenICam3 API, GUI API library, detailed API logging and comprehensive documentation.

#### APPLICATIONS

- BIOMEDICAL APPLICATIONS SUCH AS MICROARRAY READING A FLUORESCENCE MICROSCOPY
- FLAT-PANEL DISPLAY INSPECTION AND ALIGNMENT
- UAS AERIAL IMAGING
- HIGH-RESOLUTION AUTOMATED
  OPTICAL INSPECTION

GEN**<i>**CAM

#### SPECIFICATIONS

| SPECS                   | BFS-U3-50S5M-BD2                                                          | BFS-U3-50S5C-BD2                                                              |
|-------------------------|---------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| Resolution              | 2448 × 2048                                                               |                                                                               |
| Frame Rate*             | 35 FPS                                                                    |                                                                               |
| Megapixels              | 5.0 MP                                                                    |                                                                               |
| Chroma                  | Mono                                                                      | Color                                                                         |
| Sensor                  | Sony IMX264, CMOS, 2/3"                                                   |                                                                               |
| Readout Method          | Global shutter                                                            |                                                                               |
| Pixel Size              | 3.45 µm                                                                   |                                                                               |
| Lens Mount              | Sold separately                                                           |                                                                               |
| ADC                     | 12-bit                                                                    |                                                                               |
| Minimum Frame Rate**    | 1 FPS                                                                     |                                                                               |
| Gain Range**            | 0 to 47 dB                                                                |                                                                               |
| Exposure Range**        | 13 µs to 30 s                                                             |                                                                               |
| Acquisition Modes       | Continuous, Single Frame, Multi Frame                                     |                                                                               |
| Partial Image Modes     | Pixel binning, decimation, ROI                                            |                                                                               |
| Image Processing        | Gamma, lookup table, and sharpness                                        | Color correction matrix, gamma,<br>lookup table, saturation, and<br>sharpness |
| Sequencer               | Up to 8 sets using 6 features                                             |                                                                               |
| Image Buffer            | 240 MB                                                                    |                                                                               |
| User Sets               | 2 user configuration sets for custom camera settings                      |                                                                               |
| Flash Memory            | 1 MB non-volatile memory                                                  |                                                                               |
| Non-isolated I/O        | 4 bi-directional                                                          |                                                                               |
| Auxiliary Output        | 3.3 V, 120 mA maximum                                                     |                                                                               |
| Serial Port             | Supported                                                                 |                                                                               |
| Interface               | USB 3.1 Gen 1                                                             |                                                                               |

\*Frame rates are measured with Device Link Throughput Limit of 380 MBps and Acquisition Frame Rate disabled. Values are rounded down to whole numbers.

\*\*Values are the same in binning and no binning modes.
