

Hazardous Substance Manufacturer Declaration

Edmund Optics has reviewed the final rules for the PBT chemicals designated under TSCA section 6(h)*, as well as their proposed uses and exemptions. Several of these chemicals (HCBd, 2,4,6-TTB, PTCp), are used in a limited number of specific applications that do not apply to our products. The remaining chemicals, PIP and DecaBDE, are most often used as plasticizers and flame retardants and, whilst they may be present in our products as impurities or un-intentionally introduced by our upstream suppliers, are not specifically designed or specified to be present. Based on information available to Edmund Optics, and to the best of our knowledge, Edmund Optics branded product(s) supplied directly by Edmund Optics, do not contain any of the legally restricted substances, either intentionally added, or in concentrations exceeding legal threshold limits (except for use in legally exempted applications).

* *This includes, but is not limited to US Environmental Protection Agency (EPA) restrictions on Persistent, Bioaccumulative, and Toxic (PBT) Chemicals under TSCA Section 6(h) for the 5 Chemicals listed below:*

1. Decabromodiphenyl ether (DecaBDE)
2. Phenol, isopropylated phosphate (3:1) (PIP (3:1))
3. 2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP)
4. Hexachlorobutadiene (HCBd)
5. Pentachlorothiophenol (PTCP)

For any further questions or detailed clarifications, please do not hesitate to reach out to our **Compliance team** at compliance@edmundoptics.com.
