Product Details

- Variable Magnification Lens
- Up to 5 MegaPixels, 3.45m Pixel Size Sensors
- 2/3", C-Mount Lens

TECHSPEC® M Series Variable Magnification Lenses are designed for applications that may require constant adjustment of a system's field of view. Each lens provides a range of magnifications that users can adjust or lock down with a set screw. With coverage for up to 2/3" format sensors, these lenses feature compact, C-mount compatible designs for easy system integration. TECHSPEC® M Series Variable Magnification Lenses also include an adjustable iris to control light throughput and improve image quality. These lenses are ideal for use in high magnification machine vision and factory automation.

Note: Customized magnification versions are also available to meet volume requirements. Please contact technical support to discuss your specific requirements.
