## Product Details

- Transmits Visible and Near Infrared Wavelengths
- Available Uncoated or with an Anti-Reflection Coating
- Variety of Sizes Available

Float Glass Optical Windows are optical glass with polished faces that are relatively parallel and are typically used as a protective element between two environments. Float glass readily transmits visible and near-infrared wavelengths and can be used in a wide variety of applications. Float Glass Optical Windows are versatile products offered in circular and rectangular options. They are available uncoated or with BBAR (Broadband Anti-Reflective) 400-700nm coating.
