## Product Details

- 70mm (±35mm) Travel in Both X and Y
- Rack and Pinion Movements for Fast Adjustment
- Solid Top Design

X-Y Positioning Tables are ideal platforms for fast and easy positioning in both X and Y-axes. The 70mm Travel, Rack and Pinion, X-Y Axis Positioning Table uses two stacked rack and pinion movements for more precise positioning. The 70mm Travel Table can support a normal load of up to 10kg. X-Y Positioning Tables work well in labs where parts or systems need to be moved freely and often. The top platform and bottom platform of the 70mm Travel Table are removable via (4) M4 screws and can be positioned in either orientation.
