General

Model Number:

BWA-CAM-400-725-R6-EO

Physical & Mechanical Properties

Dimensions (mm):

91.0 x 85.0 x 78.0

Optical Properties

Spectral Range:

400 - 725

Regulatory Compliance

Certificate of Conformance:

View

Country of Origin:

United States

Imported By:

Edmund Optics India Private Limited
267, Greystone Building, Second Floor,
6th Cross Rd, Binnamangala,
Stage 1, Indiranagar, Bengaluru,
Karnataka, India 560038
Phone: +91- 80-6845 0000

Product Details

- Real-Time Analysis of Laser Beam Caustic, M^2, Centroid, Ellipticity, and Astigmatism
- Compatible with CW and Pulsed Lasers with Single-Pulse Capability
- Ideal for Laser Development, Quality Control, and Optical System Monitoring
- Complies with ISO 11146 and ISO 13694

Haas Laser Technologies BWA-CAM M^2 Analyzer Cameras offer real-time M^2 measurement for continuous wave and pulsed lasers in UV, VIS, or IR wavelength configurations. Featuring a simple “one-button” calibration, this system is capable of delivering M^2 measurements from a single pulse, making it ideal for dynamic or single-shot laser systems. Engineered in compliance with ISO 11146 and ISO 13694 standards, the BWA-CAM provides precise evaluation of critical spatial beam parameters, including M^2, beam profile, centroid, ellipticity, and astigmatism. Haas Laser Technologies BWA-CAM M^2 Analyzer Cameras enable users to detect optical system degradation early and optimize laser performance for maximum quality and process stability. The modular design of the BWA-CAM supports a broad range of laser wavelengths and application environments, while its high measurement accuracy and real-time data acquisition make it an essential tool for R&D, manufacturing, and laser system diagnostics.
