Full Width-Half Max FWHM Range (nm):
45nm, 60nm ±5 nm

General

Dual Bandpass Mounted Imaging Filter **Type:**

DB475/850-22.5 **Model Number:**

Physical & Mechanical Properties

Outer Diameter (mm):

Substrate Thickness (mm):

1mm

Optical Properties

Color:

Blue-NIR

Surface Quality:

40/20

Transmission (%):

≥90%

Transmission Wavelength (nm):

460-490nm, 830-870nm

Threading & Mounting

Filter Thread:

M22.5 x 0.50

Mount Thickness (mm):

5.2

Regulatory Compliance

Certificate of Conformance:

[View](#)

Country of Origin:

United States

Imported By:

Edmund Optics India Private Limited
267, Greystone Building, Second Floor,
6th Cross Rd, Binnamangala,
Stage 1, Indiranagar, Bengaluru,
Karnataka, India 560038

Product Details

- Block and Transmit Desired Key VIS and NIR Spectral Bands with One Filter
- Remove The Need for Dual Sensor Setups
- Anti-Reflection Coating for Durability and Performance
- Various Mounting Thread Options Available

Multi-Band Machine Vision Bandpass Filters feature both double or triple bandpass options in one filter, allowing for greater flexibility in system design. These filters are designed with up to ≥90% transmission in the visible (VIS) or near-infrared (NIR) spectra with various wavelength range combinations available. Additionally, these filters are AR coated for optimal transmission and feature a hard-coated, single-substrate design with superior surface quality to maximize optical performance. Multi-Band Machine Vision Bandpass Filters ensure accurate color reproduction by blocking unwanted wavelengths, eliminating the need for dual-sensor imaging. These filters are ideal for surveillance applications such as, security and intelligent traffic management, as well as normalized difference vegetation index (NDVI) imaging applications.

Note: Other filter threads are available upon request.
