Product Details

- Dome Light Performance in a Flat Housing
- Integrated Analog Controller for Precise Intensity and Dimming
- Anti-Reflection System to Absorb Stray Light
- Continuous or Strobe mode

Efflux Flat Dome Lights achieve diffuse illumination similar to standard dome lights but with a thinner, more compact housing. These flat dome lights provide a large imaging area for increased depth of focus and field of view. The convenient integrated analog controller allows precise control of power and intensity without the need for additional components. Efflux Flat Dome Lights offer greater than 90% uniformity and feature an anti-reflection system that absorbs unwanted light. Flat Dome Lights are ideal for imaging textured, shiny, or uneven surfaces.
