General

FPQ3-96RD **Model Number:**

LED Illuminator **Type of Illumination:**

CCS **Manufacturer:**

Low-Angle Square Light **Geometry:**

Illumination Mode:

Constant

Physical & Mechanical Properties

Dimensions (mm):
W 96 mm x D 96 mm x H 30 mm

Weight (g):
170

Optical Properties

Color:
Red

Wavelength (nm):
630

Electrical

Power Consumption (W):
13

Hardware & Interface Connectivity

Input Voltage (V):
24

Power Supply:
Power Supply Required and Sold Separately.

Product Details

- Improved Inspection of Rectangular and Square Objects vs. Ring Lights
- Low-Angle Lighting from Four Directions
- Ideal for Inspection of Food Packaging and PCB's

CCS Low-Angle Square LED Illuminators provide uniform diffuse illumination from a low angle in four directions. This low-angle square design helps to prevent glare and enables the detection of outlines and corners which is difficult to achieve with traditional ring lights. These lights feature mounting holes along the top and sides, allowing for flexibility with system installation. CCS Low-Angle Square LED Illuminators are ideal for embossed character recognition and inspection of square parts such as food packaging, circuit boards (PCB's), and print patterns.

Note: Power supply [#66-855](#) is required and sold separately.

Technical Information

▶ Imaging Examples for the FPQ3-100X50 Light Unit

Illumination from a low angle clearly highlights the outline of workpieces.
