## Product Downloads

### General

**Model Number:**  
UPLXAPO20X

**Compatible Tube Lens Focal Length (mm):**  
Focal Length: 180mm

**Type:**  
Microscope Objective

**Style:**  
Infinity Corrected

**Manufacturer:**

Olympus

Note:

Spring-loaded

## Physical & Mechanical Properties

Field of View (mm):

1.33

Length excluding Threads (mm):

44.45

Maximum Diameter (mm):

28

Weight (g):

149

## Optical Properties

Compatible Cover Glass Thickness (mm):

0.17

Focal Length FL (mm):

9.00

Magnification:

20X

Numerical Aperture NA:

0.80

Resolving Power ( $\mu\text{m}$ ):

0.42

Depth of Field ( $\mu\text{m}$ ):

0.43

Working Distance (mm):

0.61

Wavelength Range (nm):

400 - 1000

Field Number (mm):

26.5

Parfocal Length (mm):

45.06

Immersion Liquid:

N/A

## Threading & Mounting

Mounting Threads:

RMS / 20.32mm x 36 TPI

## Regulatory Compliance

Certificate of Conformance:

[View](#)

Country of Origin:

Japan

Imported By:

Edmund Optics India Private Limited

## Product Details

- High Numerical Aperture (NA) up to 1.45
- Chromatic Aberration Correction from 400 - 1000nm
- Uniform Image Flatness over Large FOVs

Olympus X-Line Extended Apochromat Infinity Corrected Objectives (also referred to as the UPLXAPO series) are Olympus' next generation high performance objectives that simultaneously feature high numerical aperture (NA), broadband chromatic aberration correction, and excellent image flatness. The high numerical aperture (NA) allows for excellent light collection efficiency to better capture faint signals, enabling a shorter exposure time and higher contrast. The broad chromatic aberration correction compensates for the wavelength-dependent spatial shift of colors to achieve excellent color reproduction. These objectives also achieve high image flatness from the center to the edges of images over large fields of view (FOV), making them ideal for image stitching and quantitative image analysis. Olympus X-Line Extended Apochromat Infinity Corrected Objectives are used in demanding life science and clinical applications including pathology, fluorescence microscopy, multicolor or widefield fluorescence imaging, confocal or super resolution microscopy, and whole slide imaging.

## Technical Information
