Full Width-Half Max FWHM Range (nm):
20nm, 20nm, 45nm ±10 nm

General

Type:
Triple Bandpass Mounted Imaging Filter

Model Number:
TB475/550/850-22.5

Physical & Mechanical Properties

Outer Diameter (mm):

2mm **Substrate Thickness (mm):**

Optical Properties

Blue-Green-NIR **Color:**

40/20 **Surface Quality:**

≥85% **Transmission (%):**

468-483nm, 543-558nm, 835-865nm **Transmission Wavelength (nm):**

Threading & Mounting

M22.5 x 0.50 **Filter Thread:**

5.2 **Mount Thickness (mm):**

Regulatory Compliance

[View](#) **Certificate of Conformance:**

United States **Country of Origin:**

Edmund Optics India Private Limited
267, Greystone Building, Second Floor,
6th Cross Rd, Binnamangala,
Stage 1, Indiranagar, Bengaluru,
Karnataka, India 560038
Phone: +91- 80-6845 0000 **Imported By:**

Product Details

- Block and Transmit Desired Key VIS and NIR Spectral Bands with One Filter
- Remove The Need for Dual Sensor Setups
- Anti-Reflection Coating for Durability and Performance
- Various Mounting Thread Options Available

Multi-Band Machine Vision Bandpass Filters feature both double or triple bandpass options in one filter, allowing for greater flexibility in system design. These filters are designed with up to ≥90% transmission in the visible (VIS) or near-infrared (NIR) spectra with various wavelength range combinations available. Additionally, these filters are AR coated for optimal transmission and feature a hard-coated, single-substrate design with superior surface quality to maximize optical performance. Multi-Band Machine Vision Bandpass Filters ensure accurate color reproduction by blocking unwanted wavelengths, eliminating the need for dual-sensor imaging. These filters are ideal for surveillance applications such as, security and intelligent traffic management, as well as normalized difference vegetation index (NDVI) imaging applications.

Note: Other filter threads are available upon request.
